

Locking a Bicycle

When should you lock your bicycle?

A bicycle should be locked **anytime you leave it alone outside and out of sight**. For example: outside of your school, the movie theater, or in your backyard overnight. To lock your bike, you should:

1. Use a **strong lock**
2. Find an **immovable object** to lock the bike to
3. Lock **both your frame and wheels** to the object when possible

INSTRUCTIONS: Circle the best answer for each question.

1. What is the strongest lock?

a. a rope

b. a cable lock

c. a "U"-Lock and Cable

2. What is the best immovable object to lock your bike to?

- a. a straight pole
- b. a looped pole (like a bike rack)
- c. a fence

3. What is the best way to lock your bike?

a. through the front wheel

b. through the frame & both wheels

c. through the frame and rear wheel
